- Validation

For fast food outlets, snack bars, cafeterias, food concessions, delicatessens, ice cream stands, bars, convenience stores and more... The affordable SAMSUNG ER-4900 offers many of the features found in high-cost systems.

### One-Touch Pricing

Simple one-touch pricing assures speed and accuracy. A large capacity keyboard lets you preset up to 117 items. In addition, you can use the versatile level shift function for small, medium and large items, or breakfast, lunch and dinner menus.

### 10 Department Group Totals

Conveniently divide your departments into 10 major group categories (such as food, drinks, soft-serve, etc.). One glance at your group report will keep you informed — without requiring a time consuming analysis of your department or PLU reports.

### Convenience and Accuracy

Quickly and efficiently deal with mistakes and overruns. Use the void function to correct items, or use the cancel key to abort any in-progress transaction. The key controlled transaction void function allows you to re-enter and correct any transaction after finalization.

### Eat-in and Take-out

Separate eat-in and take-out keys provide sales breakdowns. If you have different tax rules for eat-in and take-out food, these keys may be programmed to calculate or exempt the correct taxes automatically.

### Preset Tendering

You can simply press one-touch preset tender keys for \$5, \$10, \$20 or other programmable amount tenders. Post tendering gives you the option of "re-tendering" if the original tender is changed. Together these features can significantly reduce change computation losses — without sacrificing speed.

### Hourly Sales Data

The SAMSUNG ER-4900 provides information to help you plan for busy and slow periods. Sales by hour reporting details customer counts and sales activity for each hour of the day.

### Security and Management Control

Programmable options let you enforce the appropriate level of security for your business. Among many options, you can control coupons, discounts, voids, refunds, cancels and negative sales. Plus, the ER-4900 provides strict cash control with enforced closed drawer.

### Reliable System Components

- Heavy Duty Dot Matrix Printer with Separate Receipt and Journal
- Large Easy to Read Operator Display
- Standard Pop-Up Customer Display
- Full Size Steel Cash Drawer with Removeable 5 bill/5 coin Drawer Insert
