MicroPlus KDS Multivideo Kitchen Display System

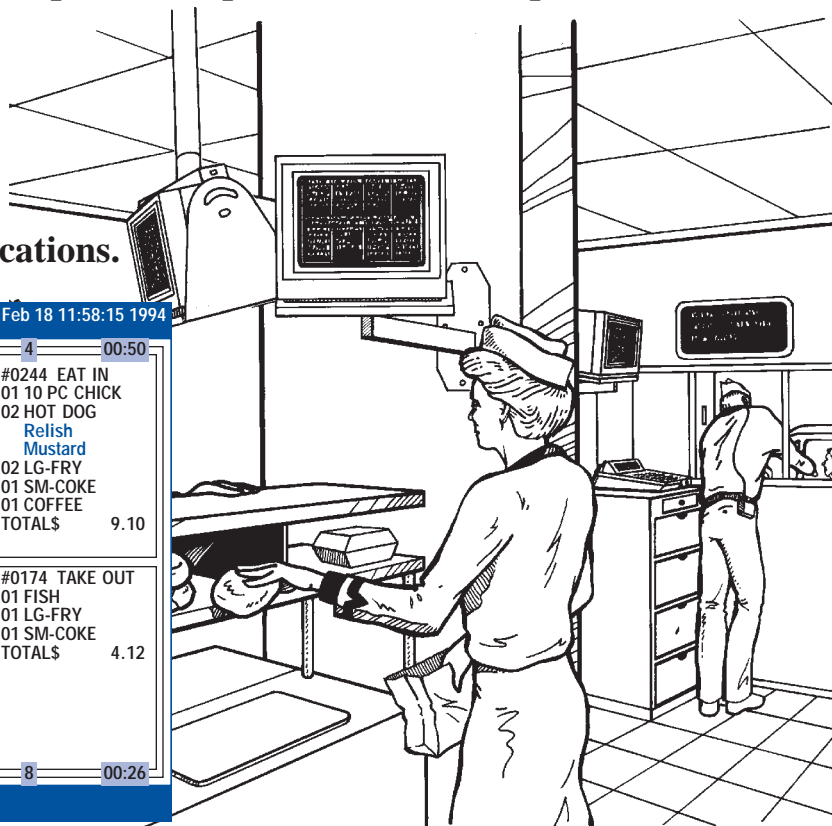

A powerful way to speed up service to your customers and increase employee productivity.

From MicroPlus — a pioneer in developing Kitchen Display Systems with state-of-the-art technology — comes the KDS Multivideo. The KDS Multivideo provides your kitchen staff with easy to read, color enhanced product orders. The system provides a powerful tool to help increase customer speed of service and employee productivity while helping reduce waste. Items may be grouped and displayed at different stations for drive-thru, food preparation or expeditor applications.

SYSTEM FEATURES

- Identical items are consolidated in each order for quick reference.
- A timer for each order displays the elapsed time each order has been displayed.
- Condiments and elapsed order time display in different colors for quick and easy identification.
- Large orders simply overflow to the next order box.
- After 8 orders are displayed, additional orders are stored in memory.
- Previously cleared orders can be recalled.
- Production statistics report allows manager to quickly monitor processing times.

SYSTEM OPTIONS

- Orders can be cleared from the display with one key stroke, or
- Orders can be highlighted viewing overflowed orders, or just marking the current order being prepared.
- Items can be automatically sorted within each order for displaying priority, such as hot items on the top and cold items on the bottom.
- Key items can be tracked for easy food preps.
- Elongated mode is available.
- Videos may be re-routed during peak and off-peak periods.
- Monitor mode available at backroom CRT for the manager.

HARDWARE FEATURES

- The KDS Multivideo System will allow operation of up to 5 kitchen videos from a single controller.
- Uses 1 to 5 standard VGA monitors (Color or Monochrome).
- Multiple keypads/bump bars can be used to operate any single monitor.
- Programming screen allows customization of KDS operation.
- All wiring uses RJ45 connectors for quick and easy installation. Simply snap the parts together.
- Flexible system allows for future upgrades that are simple and inexpensive.

CRS Systems KDS Multivideo System

The KDS Video's stainless steel, 16 key, spill-resistant keypad is used to control the access of new orders, park orders, clear completed orders from the display, and recall previously cleared orders back to the display. This same keypad controls the display of the key item summary.

Key Item Summary

All key item orders on or off the display can be consolidated and displayed in an easy to read highlighted 'Key Items' window. This summary consolidates identical main items (not including condiments) to allow the cook or preparer to easily see the total quantity of key items for all orders displayed and pending. Up to six key items may be listed.

Production Statistics

The Status Report provides management with detailed order processing statistics for managing productivity and customer service.

- Separate tracking for drive-thru and counter orders.
- The 'total order count' is the total number of orders cleared from the display since the last reset.
- The 'average process' time is the average length of time (minutes and seconds) all orders were on the display before they were cleared.
- The amount of time each order required to process is summarized into twelve 30 second time frames for easy analysis.
- The report can be reset at any time for hourly, peak period, shift, or daily analysis.
